Experience

2017 - present	Software engineer Ustream, an IBM company Ustream.tv website (Video dashboard, upload, pro broadcasting) development. Developing new applications following SOA.
2014 - present	Core Developer FuelPHP Development Team http://fuelphp.org
2015 - 2017	Web Developer, DevOps deepblue networks AG I was responsible for designing, implementing and maintaining web applications and APIs, as well as internal company processes (such as QA/code quality rules, CI/CD pipelines, and server maintenance). I was also in charge of coordinating the outsource developers.
2011 - 2015	Web Developer Freelancer

Skills

Database	Experience in MySQL/MariaDB and Redis. Knowledge of ActiveRecord/ORM patterns.
Development	Years of experience in PHP development. Knowledge of MVC frameworks. OOP, Design Patterns. HTML, JavaScript/TypeScript, CSS, SCSS, LESS knowledge.
Testing	TDD, BDD knowledge and experience, usage in legacy systems.
API	Experience in designing, implementing and using REST/SOAP APIs on both server and client side.
Other	Linux server administration, Docker, Caching (Memcached, Varnish).

Work

swatch.com	Migrated the code repository from SVN to GIT, reworked the deployment/CI workflow. I introduced QA/code review tools to the project, also refactored a big amount of legacy code.
american-spirit.de	As the lead developer of the project I was responsible for the development and operation of 3 websites (cigarette brand and company site, also an ecommerce site) and a marketing API. Maintenance of the server infrastructure and coordination of the outsource developers also belonged to me.
firstshop.hu Freelance	Custom ecommerce and inventory management application. Automatized price list and stock updating from suppliers, as well as automated ordering. Shipping and warranty management module.

Open Source Software

PHP-HTTP / HTTPlug	HTTP client abstraction for PHP. (PSR in progress) http://httplug.io
Guzzle	I am a developer of the well-known Guzzle HTTP client since 2016. http://guzzlephp.org
Money PHP	Money library for storing and using monetary values, represented as Value Objects. http://money.readthedocs.io
Webplates	Application skeletons (for Symfony, Sonata, ORO Platform, etc), useful Docker images. http://webplates.xyz

Education

2016 - present	IT engineer Pallas Athene University
2006 - 2012	Advanced level IT final exam Balassi Bálint Secondary Grammar School
2012	Intermediate level english exam
